2008 LECTURERS & TALK TITLES

CHUCK FISHER Penn State
SCIENCE COMMUNITY Chemoautotrophic
Symbioses: Making the Best of a
Potentially Toxic Environment
GENERAL PUBLIC Life at the Edge:
Evolutionary Adaptation to Extreme
Environments

JULIE HUBER Marine Biological
Laboratory
SCIENCE COMMUNITY Microbial Ecology of
Subseafloor Crustal Communities
GENERAL PUBLIC Pushing the Limits:
Microbial Life at Deep-Sea
Hydrothermal Vents

DEBBIE SMITH WHOI
SCIENCE COMMUNITY A Graveyard of Core
Complexes at the Equatorial Mid-
Atlantic Ridge
GENERAL PUBLIC Strange Seafloor Domes Not
All That Strange Anymore

DOUG WIENS Washington
University, St. Louis
SCIENCE COMMUNITY Imaging Mantle Flow &
Melt Production Beneath Backarc
Spreading Centers and Island Arcs
GENERAL PUBLIC Repaving the Earth's Surface

Ridge 2000

BRINGS THE OCEAN FLOOR TO YOU THROUGH THE

Distinguished Lecturer Series

Ridge 2000 is a nation-wide research program, sponsored by the National Science Foundation, which focuses on interdisciplinary studies of oceanic spreading centers and their associated hydrothermal vents.

Applications for the Distinguished Lecturer Series will be accepted from all U.S. academic institutions and informal science learning centers such as aquariums and museums.

Application deadline is October 1, 2007.

Each lecturer has prepared two lectures, one for a general public audience and one for a science audience. Host institutions may choose to host either lecture or both.

For more information—including complete abstracts of all of the lectures and biographies of the speakers—please visit our website: www.ridge2000.org/dls/index.php or contact us at: 1.858.534.8588.
